Sheik of Mena Village Host to Canadians

Photographed above are Nasr Enani Khattab, who recently succeeded his father as sheik of Mena Village, and Deane H. Dickson, well-known newspaper man accompanying the Canadian Pacific S.S. "Empress of France" on cruise of the world, who sent the following interesting despatch covering the caravan trip of the Canadian and American tourists, and the death of their host, Enani Khattab (right).

Thirty-two of us left Cairo by river steamer, debarking sixteen miles up the Nile at Bedrasheen, whence we journeyed by camel, donkey and sand-cart through Old Memphis and its acropolis Sakhara, another sixteen miles out on the Lybian desert. There a Bedouin camp was pitched. We ate Bedouin food, listened to Bedouin music and watched Bedouin dancers far into the night. We did not reach camp until 8 o'clock the last two hours' riding having been made in the light of the moon. At midnight the moon was at zenith. Our host, Enani Khattab, undoubtedly the most popular and probably the most wealthy of the Bedouin sheiks of Egypt, had been laughing, dancing and conversing with the rest of us. At one he went to the village, Mena, at the base of the pyramids, to get the sheik of the village to give us the best horses with us to Cairo the next morning.

A Bedouin Camp.

ing. He was conversing with his young daughter when he was seized with an attack of the heart and died almost instantly. His son, Yasar, 24, popular and handsome dromedar, who had guided us from Cairo to the camp, succeeded him as sheik of the Mena Village, with about 5,000 inhabitants. The guests were permitted to finish their breakfast before the news was broken to them. We returned—an humble horde, saddened and grieving—after a night of exquisite adventure. More than 10,000 attended his funeral in the quiet little village among them a considerable number of our passengers who had grown to respect and admire Enani after a few short hours with him. He spoke seven languages and in a gentle, well modulated voice that must have earned him great reverence from his subjects, who as sheik—mayor, police magistrate, justice of the peace, and at some ruled, nobly and well.

New Settlers Welcomed

Under the colonization scheme of Hon. George Hoadley, Minister of Agriculture for Alberta, some sixty young men from the British Isles, have been training at the School of Agriculture at Vermillion. These young men have completed the course and have now gone out to some of the leading farmers throughout the province to gain practical experience and assist in farming operations. Six are now located in Oyen district, being placed as follows: R. Lawrence to Abbott Brothers, Oyen; D. Littlefield to R. Carter, Oyen; A. C. Miller to H. Hallman; Aedia Valley; J. Chalmer to E. C. Hallman, Aedia Valley; A. Owen Jones to R. Snell, Haven; and R. Mould to E. F. VanHorne, Oyen.

At noon on the day of their arrival in Oyen, a number of business men and residents of the district joined these young men at dinner at the Alberta Hotel and welcomed them to the district.

The Hoadley colonization scheme, which is as yet in its infancy, may develop into surprising proportions. If the six young men, who came to this district are representative of the settlers who are taking advantage of it, the plan should succeed. The country needs new blood, young men of good education, with a will and earnestness to establish homes for themselves in Alberta, and an undaunted spirit to meet and overcome difficulties that are usually the lot of new settlers. The progress of these new settlers will be watched with interest throughout the province and the good wishes of all will be with them.

The Musical Eckardts gave an entertainment at the last night which was enjoyed by a fair sized audience.

Corn Growing Develops

Greater acreage than ever will be in corn in Southern Alberta the coming season, it is reported. Last year the acreage in the southern part of the Province was about 50,000 acres and it is expected this year will be doubled. Lethbridge Board of Trade plans to hold a corn show in that city in the fall.

Veteran Missionary Honored

The Cross of the French Legion of Honor was conferred with great dignity and ceremony during the past week upon Bishop Grouard, veteran Catholic missionary in the northland, by F. C. Rouquette special envoy of the President of France, who came from France for the purpose. The honor was conferred for the long years of service among his fellow countrymen in this country given by Bishop Grouard, who is now residing at Grouard, north of Edmonton.

Annual Feeder's Day

The annual feeder's day held under the auspices of the animal husbandry branch of the college of agriculture at the University, will take place Saturday, April 18, the last day of the Edmonton spring stock show. Those who attend are asked to meet at the University farm building at 10 o'clock. Results of livestock feed experiments during the past six months will be available for the benefit of those who take in the lectures.

Don't forget Dial's Community Sale a week next Saturday. (April 4.)

Report of Alberta Gaols

Reports for 1924 covering the administration of the two provincial gaols show that there was a net decrease in the average daily population of the gaols over the previous year. The Lethbridge gaol had a daily average population of 122, an increase of 11 over 1923, while the institution at Fort Saskatchewan had an average daily population of 161 or a decrease of 23 over 1923. The cost per capita for the year for the prisoners at Lethbridge was \$177.63 which compares with a per capita yearly cost of \$309.10 in 1923. The per capita cost for the year

at Fort Saskatchewan was \$243.55.

At the end of 1924 there were 138 prisoners in the Lethbridge gaol and 123 in the Fort Saskatchewan Institution.

Registered Seed Available

Alberta farmers who have not yet secured their seed for the coming season are reminded that pure registered seed grain is obtainable at the government seed cleaning plant at Edmonton, where the seed is cleaned and graded, and marketed co-operatively for the producers.

A Farm Book-keeper

for 10 Cents

EVERY farmer ought to know what his farm is making for him and which departments, if any, are not paying. To this end he needs a simple record of receipts and expenditures, along with yearly inventories of land and buildings, stock, machinery, feed and supplies.

Wants Everybody to Know That
Dodd's Kidney Pills Have Re-

Commons by R. H. Combs, Canadian Radio Trades Association, Toronto.

"I would suggest that the fee be raised," stated Mr. Combs, "to get more revenue, or that an appropriation be made by the house to give the department a sufficient sum of money

to properly control the operation of the radio in Canada, so that radio can progress along ordinary lines."

B.C. Berry Grows

Are Looking Forward to a Good Season in 1925.

British Columbia berry growers are looking forward to a good season in 1925. A recent survey shows that there are now 2,528 berry growers in the province, located in the Fraser, Kootenay, Okanagan, Salmon Arm and Vancouver Island district. The same survey shows that the acreage under cultivation to berries totals 6,308, and that the total cultivation of a dozen boxes of Dodd's Kidney Pills and they have done me much good. I make no error in recommending them to all of my fellow countrymen as a remedy for sick kidneys."

If you have any symptoms mentioned by Mr. Hardy you may be sure your kidneys need attention. Neglecting them will cause you to lose the other half the life to which mankind is heir. Dodd's Kidney Pills act directly on the kidneys, making them strong and

large berries, strawberries, loganberries, red and black currants and gooseberries.

It will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which produces ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful.

Were Wrapped in Straw

People who never look forward to the future seldom manage to get ahead.

Dominion authorities have refused
 entrance to the wine because it is
 wrapped in straw which is not labelled

with a certificate signed by a recognized sanitary authority.

A recent addition to the rejected freight is a straw packed statue destined to adorn a church in Edmonton. Orders have been received for its re-

butter destroyed during the war have

There are worlds of thoughts. Decide if you would like to be where one is going before you follow it.

Minard's Liniment for Colds

Logical Route For Shipping Western Grain To Europe Is Via Hudson's Bay Route

Repeating itself annually, from a Vancouver standpoint, the Province and Sun deplore the loss arising from export of Canada's grain through American ports. The Sun says: "Ten years ago New York was handling little or no Canadian grain. Montreal, Halifax and St. John did most of the business. Of the 1922 crop, New York handled 413,000,000 bushels of Canadian grain valued at \$7,000,000 in Montreal."

"When the Yankees go out for business they go out with a vengeance. The Yankees have gone after the Canadian grain business and today they control it. Of the 1922 crop, 173,000,000 bushels of Canadian grain moved from Port William to world markets via American boats, American railroads and American Atlantic ports."

"There is no one asking how New York or Buffalo can take this business away from Canada. The fact is that they are doing it."

"The shortest route to all Europe, therefore, the one that could best meet all competition, is the Hudson Bay route."

The Province says: "Canadian grain, routed westward, finds a market through Canadian channels only and there are no pickings on the route for the foreigner." Any profit there comes to Canadian pockets or goes into Canadian treasuries."

"The 'foreigner' is the American, our good neighbor but ultra-keen business man—the Yankee—who has placed a prohibitive tariff on Canadian wheat, yet is not averse to importing millions of bushels of it in transit."

"With the Hudson Bay route in prospect, in 1922, the Canadian grain could, and should, reach its waterway outlet, transportation at Canadian ports, thereby retaining the entire industry and profits within the Canadian Empire."

Competent authorities have estimated Canada's loss at \$35,000,000 due to the transport of grain. This would be much more than sufficient to complete the rail route to the ocean and would be paid by nature to transport Canadian export surplus of wheat."

Why not stop that kind of millions and enhance the entire Dominion's prosperity?

Even the east is becoming its opposition to the Hudson Bay project as shown by the following paragraph in the "Montreal Times":

"The Hudson Bay scheme may be impracticable. It is at least premature. But most of the world's grain and this work is of practically no value unless the road and some terminal facilities are completed. The scheme may be a piece of folly, but it would be a greater folly to leave it as it is. The opinion of experts as to its value is divided, and can be settled only by practical test."—Montreal Times.

Grazing Leases

Long Term Leases In Saskatchewan Covering Lands Not Suitable For Cultivation

By order in council, on the 7th of February, 1925, an addition was made to the Dominion grazing regulations whereby the minister of the interior is authorized to issue twenty-year grazing leases on vacant Dominion lands in the provinces of Saskatchewan and Alberta which are not suitable for farming. The order in council also authorizes the issue of renewal twenty-one year grazing leases covering lands now held under lease in Saskatchewan in districts not suitable for farming, on the condition that, upon inspection by an officer of the department, the lands are found to be unfit for agricultural purposes, and that the lease is utilizing the lands to the full extent for stock-raising purposes.

Railway Accidents

The total number of accidents on Canadian railways in February was 190, in which 12 persons were killed and 248 injured, says a return. No fatalities were killed. The following are the increasing accidents reported, and those were involved in all of them: 190, in which 12 persons were killed and 248 injured. In four of the increasing accidents the classification was "unprotected."

E.C. Dairy Ship For China

A large shipment of British Columbia dairy stock recently left Victoria for China. This consisted of a dozen milk cows and three pure-bred bulls. Included in the shipment were three pedigree Yorkshire Friesian cows, a Columbia extraction and a pair of pedigree point dogs.

"Mother, I gave you livestock to be a road boy and you are misbehaving!"—Yes, mother, I can't be held responsible.

Method Brings Good Results

Plenty of Salt Keeps Sheep in Splendid Condition

Fifty years ago and more I lived on a farm in Central Michigan, and my folks kept from 600 to 700 sheep most of the time. At that time the only dipping our sheep got was when they were driven to the river, about two weeks before shearing time, and given a good wash. In fact during those years after the Civil War, sheep that had not been washed in this way were doctored several times per pound. And yet, our sheep were never bothered with ticks. This was the method used. "Salt loss" were kept in the pasture during summer and through winter the shed during winter. In which salt mixed with just enough sulphur to cover it slightly was kept so that the sheep could run in it when ever they liked. I well remember that one year the sheavers were offered a dollar for every tick they would find on the 600 sheep, I find a man occasionally now who is using the same method with wool records, and I would not hesitate to use it if I were keeping sheep. J. T. Indiana—Stratford, Brantford, Ontario.

Expect Settlers From States

People Are Again Showing Great Interest In Canada

"We expected a number of settlers to come in from the United States this year than in any previous year," declared the W. J. Black, director of colonization and development for the Canadian National Railway, who went to Victoria to confer with members of the British Columbia government on colonization and re-organization between the provincial administration and the railway company.

"There is a real revival of interest in Canada throughout the 'Central States,' Dr. Black stated. 'I have had a conference with one United States representative at St. Paul, and we expect quite a movement northward this year.'"

War On Crows and Gophers

Alberta Had Greatest Success In Extensive Campaign

Alberta's war, against the crow and gopher, campaign has just culminated in a similar drive, which covered Canada and the United States. This latter competition was staged by a power company with \$1,500 in prizes, and as a result of the contest 97,028 crows disappeared. The Canadian contribution being 2,225. In the Alberta campaign, no less than 116,222 crows and crows were killed and 197,718 eggs were collected and destroyed. Gopher extermination was also effected in Alberta, 229,250 being killed. Alberta's prize money amounted to \$12,929.

Exports Exceed Imports

Exports of Canadian commodities exceeded imports of foreign products in value by \$20,347,726 during the twelve months ended January 31. An official statement shows total exports for the twelve months ended of \$29,820,035, compared with \$9,512,720 for the preceding twelve months. Imports amounted to \$9,512,720, as against \$19,512,560, 49 for the corresponding period of a year ago.

Pheasants In Ontario

Pheasants have been increasing rapidly in Northern Ontario and are now capable of taking care of themselves even in the roughest winter weather, according to a statement made in the annual report of the deputy minister of game and fisheries.

New College For Edmonton

It is understood that a college for all nationalities will be erected at Edmonton by the Catholic educational authorities. The Carnegie Foundation is to give \$100,000 for the building, and towards the cost, which is estimated to be \$250,000.

Clearing Rusty Tools

Take the lid of an ordinary round baking powder can and partly fill it with a thick mixture of the emery and oil. Then use the emery mixture with an ordinary cork, bend handy for the purpose, and rub it over the surface of any slightly rusted tool or other article of steel. This will instantly remove the rust and leave a fine protecting film of oil.

Erect New Greenhouses

Contracts have been let by the Saskatchewan Government and the Greenhouse Company for the erection of two new greenhouses, one at Outlook and the other at Broadview, building to contain 100,000 sq. ft. each. The company already owns and operates a dozen greenhouses in the southern portion of the province.

Dairy Production Of Canada

Western Provinces Becoming Increasing Factors In Dominion's Output

The total annual dairy production of Canada is valued at between \$25,000,000 and \$26,000,000, stated Dr. J. A. Rudick, Dominion dairy commissioner. A recent address before the Rotary Club of Ottawa, giving details, Dr. Rudick stated that in 1923 the total production in various lines in Canada was as follows: Cheese, 131 million pounds; creamery butter, 162 million pounds; dairy butter, 180 million pounds; whey butter, 22 million pounds; condensed milk, 27 million pounds; besides milk powders, etc., and 1,400,000 gallons of ice cream. The total quantity of milk required for all these products reaches the stupendous figure of 11,765,543,229 pounds.

Dr. Rudick said that the three prairie provinces are becoming very important factors in dairy production. In 1900 they produced one million pounds of butter; in 1924 the amount was 47 million pounds, and it is estimated that at the present rate the prairie provinces will be about 50 million pounds in 1925.

Canada's export trade in dairy products during 1924 comprised 12 million pounds of cheese, 22 million pounds of butter, three million gallons of cream, two million gallons of milk and 50 million pounds of condensed milk.

Sale Of Ranches

Alberta Cattle Ranches to Be Divided Into Small Farms

The sale has been announced of the 12,300-acre farm of George Lane at Namska, Alberta, to the Canadian colonization farm for an unnamed sum. The value of the farm is stated to be \$65,000. The sale is also announced of the Howards Ranch in the British Columbia district, near Kamloops, of 10,000 acres, and the 10,000-acre ranch of the Bar U Ranch of several thousand acres, which adjoins the 12,300-acre farm of George Lane at Namska, Alberta. During his visit to Canada in 1919 the Prince was a guest of Mr. Lane at the Bar U Ranch, and was the host to the help to the British throne bought his 6,000-acre ranch.

England Using Canadian Fish

Business In Experimental Stage But Results Are Satisfactory

A large party of commercial and business men from London, interested in the importation of fish from Canada, visited New York, Monmouthshire, and inspected the facilities this port has to offer for the development of this trade.

Although the business has as yet only reached the experimental stage the results are highly encouraging. Six tons of Nova Scotia fish were recently sold at Billingsgate and at Glasgow and in two French markets. The dealers of which, although at first, afterwards admitted that buyers for the big hotels and stores had been unable to distinguish between the Canadian fish and that originally offered.

G.P.R. Plans Branch Line

The Montreal and Pacific Railway will apply this season for an act authorizing it to construct a branch line commencing at a point on the Moose Jaw and southwesterly branch, to be extended in a southerly and southeasterly direction to a point "near township one or two." Notice of the application appears in the Canada Gazette. The application also seeks the right to lease securities to an amount not exceeding \$100,000 per mile.

Druggist (To His Stout Wife) "Don't Try To Sell Six Boxes of My Fat-Reducing Mixture"

"Don't try to sell six boxes of my fat-reducing mixture," said a druggist to his stout wife. "I am trying to sell six boxes of my fat-reducing mixture."

Several Good Reasons Given Why We Should Work For The Elimination Of Warfare

Shipments Of Argentine Cattle

May Look For Keener Competition On European Market

Although without a doubt exportation of live cattle to Europe from the Argentine is bound to have some effect on the market it need have no marked discouragement on Canadian shippers. It is, however, indicative that for the future we must look for keener competition, and improvement if possible of quality. It will be noted that a cablegram from the Argentine is bound to have some effect on the market it need have no marked discouragement on Canadian shippers. A Romance of the Spanish Main

CAPTAIN BLOOD

RAFAEL SABATINI

Copyright, 1932, by Rafael Sabatini
"CAPTAIN BLOOD," a vignette picture with J. Warren Krueger
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, who had been wrongfully condemned as a slave to the Barbadoes under King James, falls in love with Arabella, niece of the military commander, at Bridgetown. He leads his fellow rebels into an attack on a Spanish ship which had laid the city low and captured the captain for Tortuga, the rendezvous of the pirates of the Spanish Main. He accepts command of a buccannier fleet with Levasseur, a Frenchman, and his ship, under him, is the daughter of the friendly Dutch governor of Tortuga, is fascinated by Levasseur. Levasseur breaks faith with Blood and captures a Dutch brig on which in Madelon, the beautiful Blood lands at the island where Levasseur proposes to take Blood as a hostage for ransom. Captain Blood pays the ransom, and Levasseur and his crew sail. Blood runs into his brother, Captain, his aide, enters with Blood, who makes Madelon and his brother his guests on board his ship.

CHAPTER XVI The Milagrosa

In Tortuga, during the months he spent there, the three ships he had captured from the fleet that had gone out to destroy him, he found himself almost an object of worship in the eyes of the wild brethren of the Coast, all of whom were clamorous for the honor of serving under him. It placed him in the rare position of being able to pick and choose the crews for his augmented fleet, and he chose fastidiously. When next he sailed away it was with a fleet of five blue ships in which were assembled over a thousand men. Thus you behold him not merely famous, but really formidable. Three captured Spanish vessels he had renamed with a certain scholarly manner the *Clotho*, *Lachesis* and *Atropos*, a grimy, jocular manner of conveying to the world that he made them the arbiters of the fate of any Spaniards he should henceforth encounter upon the sea. And meanwhile the Spanish Admiral, Don Miguel de Espinosa, was raging up and down the Caribbean seeking his quarry, and in the meantime, as an hour dawns to his vindictive appetite, he felt upon his ship of England or of France that loomed before his horizon. This time the Spanish Admiral and great gentleman of Castle had lost his head. And so, reckless of the fact that Captain Blood was in vast superior strength, the Spaniard sought him up and down the trackless seas. But for a whole year he sought him vainly. The clouds shrouded him finally eventually they met on the 15th September of the year.

ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know About Lydia E. Pinkham's Vegetable Compound

Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound I felt miserable, and had no energy. I was living in Miss Craig's time and two days and came in and told me her experience of using the Vegetable Compound and advised me to take a bottle, which I finally did. I began to get better and a stranger and those who had used it found out about this medicine as I think there is none equal to it for women who have troubles of this kind. I cannot praise the Vegetable Compound enough. The good it has done me. Whenever I need a woman's medicine, I write to tell her of it.—Mrs. Wm. R. Kingston, R. R. No. 1, Mount Forest, Ontario.

Women throughout the Dominion are finding health in Lydia E. Pinkham's Vegetable Compound.

No harmful drugs are used in its preparation—just roots and herbs that can be taken in safety even by a nursing mother. For sale by all druggists.

W. N. E. 1669

Grain inquiry Cost

The total cost of the royal grain inquiry commission was \$170,610. This information was given by Hon. R. J. Macdonald, Conservative, Port Williams, in the House of Commons, by Hon. T. A. Low, minister of trade and commerce. Even and living allowance paid to members of the commission totaled \$14,832. Of this amount \$8,500 was paid to D'Arcy Street, \$18,177 to S. H. Woods, and \$13,355 to J. T. Fisher.

The Royal Mary was warped out of St. Nicholas. Each could tell the other much upon which the other desired information. Considering how his mind was changed with the business of his mission, it is not wonderful that he should have come to talk to her of Captain Blood. Indeed, there was a circumstance that directly led to it. "I wonder now," he said, as they were stammering on the poop, "if you ever saw this fellow, Blood, who was at the time in your uncle's plantations as a slave."

"I saw him often. I know him very well."

"To do that?" and came to lean beside her. "And what manner of man did you find him?"

"In those days I encountered him for an unknown gentleman."

"You were acquainted with his story?"

"He told me. That is why I esteemed him—for the calm fortitude with which he bore adversity. Since then, considering what he has done, I have almost come to doubt if what he told me of himself was true."

"If you mean of the wrongs he suffered at the hands of the Royal Commission that tried the Montserrat rebels, there is little doubt that it would be true enough. That is certain."

"He was convicted on a point of law which he may well have been ignorant of, but he committed what was construed into treason. But, faith, he has at his revenge, after a fashion."

"That," she said in a small voice, "is the unfortunate thing. It has destroyed him—decease."

Lord Julian was seeking to comfort and encourage her.

"Destroyed him?" His lordship laughed a little. "The name is not that. He has grown rich, I hear. He has translated, so it is said, his Spanish skills into French gold, which the one buccannier whom he made his particular quarry—that Peter Blood, who once had been his slave—clad him in ermine. He could as much be called into the King's service under Charles II. It occurred to him that a similar course might be similar to his effect with Captain Blood."

Acting upon this conclusion, Lord Julian went out his kinsman, Lord Julian Wade, with some commissions to his effect with Captain Blood. The reality here, master of all labyrinthine intrigue, advised his kinsman that in view of his failing limbs he was unable, or judging for other reasons that it was not desirable to enlist him in the King's service, he should turn his attention to the officers serving under him, and by seducing them away from him leave him so weakened that he must fall an easy victim to Colonel Bishop's fleet.

The Royal Mary had a good passage to St. Nicholas, her last port of call before Jamaica. It was understood that as a preliminary, Lord Julian should report himself to the Deputy-governor at Port Royal, whence at need he might have himself conveyed to Tortuga. Now it happened that the Deputy-governor's ship had come to St. Nicholas some months earlier on a visit to some relatives, and so that she might escape the insufferable heat of Jamaica in that season. The time for her return being now at hand, a passage was sought for her aboard the Royal Mary, and in view of her noble rank and position, promptly accorded.

Lord Julian left her advent with satisfaction. His lordship was one of our gullible to whom existence that is not graded by womanhood is more or less of a stagnation. And Miss Arabella Bishop was a young woman and a lady; and in the latitude into which Lord Julian had strayed this was a phenomenon sufficiently rare to command attention. On his side, with his title and position, his personal grace and the charm of a perfect courier, he bore about himself the atmosphere of the great world in which normally he had his being—a world that was little more than a name to her, who had spent most of her life in the Antilles. It is not therefore wonderful that they should have been attracted to each other before

INECTO RAPID

The world's best hair restorer. Will restore grey hair to its natural color in 12 to 15 days. Small size \$2.50 by mail. Cottle Size \$3.50 by mail. The W. T. Premier Stores Limited Phone M. 2374-4, 129 Yonge St. TORONTO, ONTARIO

Dog Heroes of the Alps

St. Bernard's Trained to Find People Lost in Mountains. The hospice of St. Bernard, situated over eight thousand feet high in the Alps, can boast that it is one of the oldest and most interesting institutions of its kind in the world. It was founded in A.D. 942 by a nobleman named Bernard de Meulan, who wished to give shelter to pilgrims making their way across the Alps to Rome.

But in the minds of most people the hospice is mainly remarkable for its dogs and for the wonderful deeds they have performed in saving the lives of missing travellers. An average number of twenty St. Bernards is kept in the hospice kennels, and each is trained in the task of searching for persons lost in the mountains. Having found them, the animals afford them the first aid possible, and then guide them to the hospice or go for help.

One of the most wonderful of the dogs attached to the monastery was Barry, to whom a monument stands in the courtyard of the hospice, with the inscription: "Barry, the heroic, saved the lives of forty persons and was killed by the forty-first." The manner of this noble hero's death is unknown, but it was believed to be a case of mistaken identity.

Find Traces of Mammoths

Famous English Cricket Field Was Once Hunting Ground

Mammoths used to fight and play at the Oval the famous cricket ground in Kensington, London, 10,000 years ago in the ice-age before the cricket ground was made. The shoulderbone of one of these immense woolly elephants was unearthed by workmen while excavating near the Heligraze Hospital for Children, Clapham Road. The bone, which is fan-shaped and measures 3 ft. 4 in. by 2 ft. 8 in., was found by the secretary of the hospital. He at once communicated with the authorities of the National History Museum, who inspected the find, and declared that it belonged to one of the mammoths which used to make the Thames Valley their hunting ground.

Find Ancient Roman Relics

Interesting Discovery of Roman Occupation Is Unearthed in Britain

Ten thousand Roman coins, pottery, jewelry and two iron dice have been unearthed at Richborough Castle at Sandwich, county of Kent, Eng. Most of the coins are copper. Among the relics of the Roman occupation were stone slabs bearing many straight lines across their faces, and forming small squares between the lines.

Walter Klein, the excavator, thinks the slabs were used in games played by Roman soldiers. "They resemble word puzzles," he said.

Wolf Attracted By Radio

Music Lured Animal to Clearing Where It Was Shot

Lured from its forest fastness by the seductive strains of radio music, a large timber wolf fell prey to the gun of Thomas Hungerford at Fox Point, Ont. The animal wandered into the yard of Joseph Taylor and stood by a radio aerial pole, bewitched by the music from a Buffalo broadcasting station, when Mr. Taylor telephoned Mr. Hungerford to get his gun.

When the hunter approached, the growler made for the thicket, but before it could escape, a well-directed bullet laid it low.

Will Use Radio

For the first time in its history the Canadian Manufacturers' Association will use radio in a campaign when P. W. Stort, chairman of the association, goes in charge, and Joseph Beaudin, vice-chairman, will broadcast "Produced in Canada" addresses from station CKAC, Montreal.

Mrs. Oscar Sabatini, the only woman to become a first-grade detective on the New York police force, has retired after serving 28 years.

Teacher—"Jimmy, if I said, 'I am beautiful,' what tense would it be?" Jimmy (promptly)—"Past (enough)"

Interesting Peace Ceremony

Dyaks of Dutch East Indies End Inter-Tribal Feud

Dispatches from Borneo, Dutch East Indies, give interesting details of a peace ceremony between the different Dyak tribes of that island. These clans have been constantly fighting each other for years, and have a reputation of being ferocious and bloodthirsty head-hunters. Some 4,000 Dyaks came to the gathering. There were present also a few Dutch and British officers, who witnessed curious war dances, songs and prayers by medicine men. Finally the head priest killed a pig by a slow method and sprinkled its blood over the multitude, pronouncing a terrible curse upon anyone who should presume to revive the inter-tribal quarrels.

An Interesting Discovery

Geologist Finds Water in Crystal Ten Million Years Old

Clear and sparkling as they might have just bubbled from a spring, drops of water more than 10,000,000 years old have been found by O. C. Harrington, head of the geology department of the field museum of natural history. They were imprisoned in crystal quartz picked up from rock formations in Brazil. The estimate of the age is based on the character of the rock which belongs to a period that, some scientists declare, flourished over 100,000,000 years ago—Popular Mechanics.

Notwithstanding all the arguments that have taken place, very few debatable questions have been answered.

WORLD HAPPENINGS BRIEFLY TOLD

Jacob Gould Schuman, new United States minister to China, has been named by President Coolidge as ambassador to Germany.

The Canadian Pacific Railway handled 5,751,645 tons of grain to Port William and Port Arthur during 1924, and 54,256 tons to the port of Vancouver in the same year.

Ramon de Valera, the Irish Republican leader, issued a rhetorical St. Patrick's Day message to Irishmen abroad, appealing to them to rally to the aid of their "threatened country."

Daylight saving will come into force in Montreal on May 3 this year and will cease on September 27, according to a motion carried in the city council.

All the way from East Africa, 5,000 miles, a native brought a sample of hog blood containing a dread animal disease, to the department of agriculture, Washington, for experimentation purposes.

A new service by direct cable between New York and New York, over which it is hoped to transmit cable five times faster than heretofore, was successfully inaugurated. Total length of new line is 5,422 land miles.

Hon. George B. Graham, minister of colonies and Canada, stated in the House of Commons that 1,936 miles of rural road were constructed or improved under the Canada Highway Act in 1924.

On the heels of the shore controversy over the value of seaplanes, the United States war department has ordered a fleet of 100 new observation and pursuit planes, the cost of which will total nearly \$12,000,000.

Run it for Lame Back—A brisk rubbing with Dr. Pierce's Kidney and Bladder Pills will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As rheumatism, neuralgia, sciatica, etc., run out and there are ample grounds for saying that it is an excellent article.

Alberta and B.C. Press Association The Alberta Press Association executive met in Edmonton and fixed the dates of the annual meeting as August 28 and 29, at Edmonton. The British Columbia Press Association will meet at the same time, also in Edmonton.

Mr. Laura Henderson

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggist has been of great benefit to me as a tonic and nerve. Whenever I feel in a nervous, nervous condition, a bottle of the "Prescription" tones up my entire system quicker than any other medicine I have ever taken, and it keeps me well. I heartily recommend this medicine to every woman who is in a debilitated condition. It is safe and reliable tonic and nerve, and is a healthful food. Mr. Laura Henderson, 224 Canterbury St.

Dairy Convention For Winnipeg

Arrangements Made For 1925 Meeting Says Manitoba Dairy Inspector. Mr. L. A. Gibson, provincial dairy inspector for Manitoba, recently announced that arrangements have been completed for the holding of the 1925 annual convention of the Western Canada Dairy Association in Winnipeg. Representatives of the Manitoba Dairy Association and of the Manitoba Buttermakers' Association met to decide on the dates of the convention, and also to discuss upon various competitions of the provincial associations for the ensuing year. During the past year, 189 carloads of creamery butter were shipped out of the province of Manitoba, a total of 4,425,200 pounds valued at \$1,053,546. The shipments included 29,000 boxes of unsalted butter that were shipped to the British market, the first time that Manitoba has shipped unsalted butter to this market.

"DIAMOND DYE" IT A BEAUTIFUL COLOR

Perfect home dyeing and fast coloring guaranteed with Diamond Dye. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint clothes, curtains, draperies, dresses, coats, stockings, awnings, draperies, coverings, hangings, everything. Buy "Diamond Dye"—no other kind—and tell your druggist whether the material you wish to dye is wool or cotton. It will color in linen, cotton, or mixed goods.

A Woman Car Distributor

Miss Lucy Wright Has Responsible Position With U.S. Railroad. Mrs. Wright must know cars and car conditions. A great many have been a shilling of freight cars, and in the same manner an unusual career. She is a woman of the car, the car of the car. As early as 1890, or a late fall affects the demand for freight cars, and the freight cars are sold in many parts of the car brings new problems.

Lucy Wright, general car distributor of the Great Truck Railway, is said to be the only woman in the United States occupying the position that carries with it a demand for great executive ability. It is her duty to keep on the move thousands of freight cars and to meet promptly the demands of shippers. As the freight cars the railroad a dollar a day and Miss Wright has 15,000 cars in her disposal, she must always be ready to play warden in many parts of the car.

Americans Dance To Music From London

Radio Programme Picked Up By New York City Stations. The first radio programme of London dance music to be successfully broadcast to a large American audience has been sent out from Station WJZ, New York City, and WRC, Washington.

The title of the Hotel Savoy, London, dance orchestra, was picked up by the United States stations, and broadcast on a different wave length by the Radio Corporation of America. The radio audience also heard the strains of "Big Ben" on the clock tower of the House of Parliament strike the hour of midnight.

Increase In Hog Production

Four to six million of 2,500,000 were marketed at the stockyards and packing plants of Canada during the year 1924, as compared with 2,200,000 in 1923. The greatest amount of increase was in the prairie provinces. In 1923 there were marketed in these places 695,000 hogs, and in 1924, 1,045,000, a 50 per cent. increase.

Wheat Goes to United Kingdom

There was a heavy increase in the quantity of Canadian wheat shipped to the United Kingdom in 1924, amounting to 50 per cent. over 1923, according to a statement of the department of trade and commerce.

Children of Mature Parents

Scientists say that a father of age 45 years of age has (as times) as good a chance of becoming a parent as a young man would if his father was a young man.

Demonstration Farm For Russia

Will Be Equipped With Modern Machinery and Implements. Seven groups of Russian farmers, who have lived for a time in the United States, left New York recently to go to the direction and organization of the Technical Aid Society to establish modern farms in Russia. There will be demonstration farms for the Russian peasants. All these groups have equipped themselves with modern machinery and implements. These groups were sent by the Technical Aid Society to settle in communities in Soviet Russia.

HEART TROUBLE SHORTNESS OF BREATH

Mrs. Geo. E. Downman, Morrisburg, Ont. writes: "I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills. Two years ago I became very poorly with my heart and nerves and whenever I took the heart little bit of exercise my heart would start to jump and flutter. I could not walk without difficulty, and I was in a bad way before I was half-way up, on account of my heart being so short."

MILBURN'S HEART AND NERVE PILLS

and in no time I felt a great improvement, and can now heartily recommend them to all those who are troubled with any affection of the heart. I & N Pills are for sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Good Season For Lumbering

Conditions Have Been Very Favorable In Thunder Bay District. Winter lumbering in the Thunder Bay district will show better returns to operators this year than several seasons. The conditions have been exceptionally good. Fine weather has prevailed in the woods since the cut was started late last fall. It is estimated that close to 35 per cent. of the total winter cut will be used for home manufacture, while 40 per cent. will be rafted for export to the United States mills.

Earthquake Shocks

Not a day passes without earthquake shocks occurring in some part of the globe. Japan averages something like three every twenty-four hours.

Suffered Misery With Itchy Eczema Cuticura Healed

"I was troubled with eczema for two years. At first it appeared in my arms, and then it spread all over my face and body. After the first application of Cuticura, I continued the treatment, and in a few days I was cured. (Signed) Miss Y. Wood, 288 City Hall Ave., Montreal, Quebec."

Accepted Chalmership

Canada is interested in the announcement from London, England, that the Halifax Municipality has accepted the Chalmership of the Imperial Economic Committee, which is to be the \$5,000,000 guarantee that the British Government has set aside to encourage the marketing of Dominion products in the United Kingdom, should be agreed.

Saved Empire Exhibition

Duke of Devonshire Guaranteed Five Times As Much As Government. A. M. Stamp, parliamentary secretary of the overseas trade department, has officially revealed the fact that the Duke of Devonshire guaranteed the exhibition in the early days, saying: "The government, first of all, guaranteed \$100,000, but at a later date the Duke of Devonshire guaranteed \$500,000 out of his own private exchequer. Had he not done so, the exhibition would have shut up shop and then the government, he added, had very properly taken over that guarantee and ratified it."

Expect Record Tourist Trade

According to estimates by officials of the Montreal steamship companies, more than 40,000 tourists, the largest number on record, will sail from Montreal for Europe during the coming season of navigation. They will include a larger number of United States citizens than ever before.

New Canning Factory

Depending largely upon what arrangements can be made with the local tomato growers, the Okanagan Packers, Ltd., are planning to construct a canning factory and truck house in the Okanagan district, Kelowna.

Define Boundary Line

No Dispute Between Canada and U.S. Regarding Territory.

The treaty between Canada and the United States reported to the United States senate recently, are those signed on February 24, by Wellington, by Hon. Ernest Lapointe and Secretary of State Hughes.

The one dealing with the demarcation of the boundary line in the Mackinac Bay, N.B., and also provides for a "more practical definition of the boundary line" which runs through the Lake of the Woods to a point described as the northwest point of that lake.

It also provides for the relocation and repair of lost monuments which mark the boundary line between Western Canada and the United States. It provides that the western boundary shall consist of a series of right or straight lines adjoining adjacent monuments as now established or re-established.

No territory is actually in dispute, the Lake of the Woods adjustment being chiefly designed to give more precise definition of the two small areas of United States waters in the Lake of the Woods, which the former demarcation is entirely surrounded by Canadian waters.

The New Brunswick adjustment concerns British waters of the Lake of the Woods, which the former demarcation is entirely surrounded by Canadian waters.

The treaty also provides for inspection lines in time of the boundary line between Canada and the United States, for the repair of damaged monuments, and for the maintenance of an effective boundary line.

Record Of British Fleet

Made Trip of 17,000 Miles With No Breakdown.

Seventeen thousand miles from London to India and back, including a flight round Mount Everest, with a single breakdown on a survey of the imperial air routes through Baghdad, Calcutta and Rangoon, Cuthbert's trip was a record for a single ship.

The trip was more remarkable than the famous trip of the battleship, which was a record for a single ship. The trip was more remarkable than the famous trip of the battleship, which was a record for a single ship.

MOTHERS PRAISE BABY'S OWN TABLETS

Mrs. L. M. Brown, Walton, N.S., says: "I cannot recommend the Baby's Own Tablets too highly. I have found them invaluable for the ailments of little ones." Mrs. Brown's testimony is borne out by the experience of other mothers who have used the Tablets. To use them often is a sure guarantee that they will always be kept in the home as long as there are babies or young children to be cared for.

The Tablets are a valuable—mild but thorough in action—which never fail to regulate the stomach and bowels; relieve constipation and indigestion; break up colds and simple fevers and make the dreaded teething period easy. In fact they banish all the minor ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sale of Coal in National Parks

The regulations governing the licensing of businesses, trades, or occupations within Canadian national parks were amended by order in council dated February 2, 1925, so that every person selling coal by weight within the parks shall have all coal sold in quantities or loads of one thousand (1,000) pounds each or over, weighed on the scales maintained by the department for the use of the public. The fee for weighing coal shall be fifteen (15) cents per load.

Expect Record Tourist Trade

According to estimates by officials of the Montreal steamship companies, more than 40,000 tourists, the largest number on record, will sail from Montreal for Europe during the coming season of navigation. They will include a larger number of United States citizens than ever before.

Struck Wealth of Gas by Accident

IN AND AROUND MEDICINE HAT, some street, a drilling company's derrick and the Canadian Pacific gas well at Medicine Hat, July 1918, 1920. There was a close proximity of the well and the derrick, and the derrick was struck by lightning on the day, an accident to the well.

JUST thirty-nine years ago, in July, 1885, to be exact, a small crew of men in the service of the Canadian Pacific Railway, unloaded a portable water-well drilling machine at a point near where what is now the village of Allison, Alberta, thirty-five miles west of Medicine Hat, on the main line of the company. The crew had been sent to this spot to drill for water and set to work. Little did these men realize that they were about to make a find that was to be the beginning of a widespread industry. Perhaps they were disappointed when, instead of the water they were seeking, gas appeared in their well, but if they could have looked into the future they would have seen that this first gas well was to be the cause of the expenditure of millions of dollars in the employment, directly and indirectly, of thousands of men, and the opening up of an enormous area stretching from the Peace River in the north to the International boundary in the south, and from the Rocky Mountains in the west to the Alberta-Saskatchewan line in the east.

So much interest was immediately aroused over the discovery of natural gas in this well that others were drilled in Medicine Hat, and the results were not gratifying until the year 1920, when gas was discovered in considerable quantity while drilling was being conducted in search of coal, and it was then found that it could be obtained in commercial quantities in what is now known as the Medicine Hat sand, at a depth of about one thousand feet. In 1920 the first deep well was sunk and a splendid flow of gas was encountered, from which the city of Medicine Hat has enjoyed the benefit of natural gas up to the present time, with the further prospect of a long-continued supply.

After the Canadian Pacific Railway drilled a number of wells for its own use, and other concerns entered the field. The wells at Pincher Creek were drilled for oil, which was produced for a time, gas in insignificant quantities being also encountered, but

these and many other wells resulted in disappointment to their promoters. There were times that the heartaches and the tragedies and the losses far exceeded the successes and the gains, but the did not deter the men who were willing to stake their all on what they had undertaken to do, and it is to their determined efforts that the later developments of petroleum and natural gas are due.

The next gas field of importance to be developed was the Bow Island field, on which work was begun in 1908, on the south bank of the South Saskatchewan River, on the Crown's Nest branch of the Canadian Pacific Railway. It was in this field that Canada's largest gas well was drilled, producing, when completed, approximately thirty million cubic feet of gas per day, and it was on the strength of this development that the enormous sixteen-inch pipe line, one hundred and seventy-five miles in length, was financed and built in order to supply the towns en route.

It was in this field that the later developments of petroleum and natural gas are due. In 1914, the first well was drilled here in search of oil, and at a depth of about two thousand feet, gas in very large quantities was found. Recently another well has been completed in this field, which is now producing over seventeen million cubic feet of gas per day and is one of the largest gas wells in Canada, giving to the towns and villages along this route an almost unlimited supply of gas. As many as three hundred wells have been drilled in Alberta up to the present time in various sections of the province. Not all have been productive, of course, some having to be abandoned on account of drilling difficulties, while others did not yield the large quantity, or did so in such small quantities as not to be worth the expense of further development, and so were abandoned for more productive fields.

The possession of this natural resource to the people of Alberta is of enormous value and the importance cannot be exaggerated. It has played a big part in the past and will play a big part in the future in the development of the province. It remains for the people themselves to see to it that it is properly used and conserved for posterity. —Western Star Magazine.

About Town and Country

B. H. Dial, Auctioneer, will hold a community auction sale in Oyen on Saturday, April 4, at the hour of 1 p.m. Anyone desiring to list articles for sale, notify the Oyen News or B. H. Dial, before Saturday March 28.

Dr. Jamieson, Chiropractor, will come to Oyen regularly on Wednesday and Thursday each week. Office on Main Street one block south of Bank of Toronto, in the building formerly occupied by G. Bach.

John Gaw, who has been relieving at the Youngtown branch of the Bank of Toronto for a few days, returned to Oyen yesterday.

Ed. Hogan, of Kirkwall district, who has been spending the last three years in St. Paul, Kansas, returned to Oyen last Sunday. Mr. Hogan intends to continue farming operations.

Monday's sunny weather and yesterday's wind made a great difference to the appearance of the country hereabouts. The snow is rapidly disappearing and for the first time in over four months the roads are muddy.

I have taken over the Home Grain Coal sheds and have Newcastle and other high grade coal on hand at all times.

—O. F. Kirkpatrick.

Say you saw it in the News.

SIBBALD ITEMS

Born—On March 16, to Mr. and Mrs. Campbell Rose, a daughter.

The members of the W. L. at Sibbald are rehearsing the play "The Spinster's return" a sequel to the "Old Maid's Convention," which they presented so successfully a few years ago, they expect to present the play on April 3.

Ben the Chinaman, has closed his laundry business and left town.

Mrs. Geo. Loughheed has shipped her household effects and is visiting with friends a few days before leaving to join her husband at Kimberley, B.C., where they expect to make their home.

J. McKim and C. O. Dudley have been taken on the staff of the Sullivan Mine at Kimberley.

We learn that Mr. Kearns, lately returned from B.C., is taking over the DeWine farm from Mr. Linklater.

Mr. and Mrs. W. Linklater spent a few days in Calgary last week.

Mrs. A. Caswell is spending some time in Calgary, where she is under the doctor's care.

Mr. Frank Harrison lost a valuable horse on railway track a few days ago, when it was killed by a freight train.

Mr. Cecil Bowd, left on Monday night for Kimberley, B.C.

Mrs. K. Lail is opening up a lunch room in the house next to the garage and expects to be ready for business by the first of the month.

D. E. Gibson and family have returned from the States, where they spent the winter.

Paul Goldammer, who left the district in the fall of 1923, returned to Oyen last week. During his absence from this locality, he has been in six of the western States as well as in B. C.

The sale of home cooking and brown bread and bean supply, held last Saturday by the Oyen Sunday School, was a great success. Some 70 odd dollars was realized from the function.

The funeral of Mrs. Ed. O'Reilly, whose death occurred suddenly on Monday, March 23, took place today in Oyen. Services were held at the Sacred Heart Church and interment followed at Oyen Cemetery. Mr. and Mrs. O'Reilly had been spending the winter in Ontario, and only returned to the district last Saturday.

EXCEL ITEMS

Word has been received that the Crown Lumber Company, intend to move their yard from Excel. Mr. Gagstetter expects to be away in about a month's time.

Messrs H. L. and R. Bishop, have rented the Tom Hove farm for this year.

Mr. James Barker, has rented the Gagstetter farm.

The rabbit drive at Mr. Caskey's farm was only a partial success. 100 rabbits were killed. Plans are being made for an other next Saturday, and it is expected that much better results will be obtained.

In Lighter Vein

The real wide open spaces are to be found in the cross-word puzzle country.

Lady—"My husband is a deceitful wretch. Last night he pretended to believe me when he knew I was lying to him."

Nothing seems more inappropriately ribald than the merry whistle of the dentist as he glides around for a sharper bit for his drill.

In the spring the curler's fancy lightly turns to thoughts of gold.

Around the golf course, brown and sore, I chase the little pill; I "hunt and swat" at them, o'er dale and ditch and hill. My game is rotten; in my heart I feel the loss to kill; and when I've holed the final putt, I'm nervous, weak, and ill. I guess I've sworn a hundred times, in words I now deplore I'd not indulge a habit which all tomorrow's bright and fair, as I have done before, with hopeful heart, I'll grab my clubs and early forth once more.

A little bee
Sat on a tree
And then he sat on me.
